

# Welcome to the California Department of Public Health Special Session: Therapeutic Treatments

Wednesday, January 26, 2022

# Navigating the Teams Taskbar

Use the chat or raise your hand to signal the host.

Turn video and microphone off and on to be seen and heard.

# Housekeeping

Reminder! Please mute yourself when not speaking to avoid feedback and background noise.

Please introduce yourself by adding your name, role and organization into the chat.

This session is being recorded. Slides and recording will be available on <https://eziz.org/covid/education/>

# Agenda: Wednesday, January 26, 2022

| No.                | Item                                            | Speaker                    | Time (AM)    |
|--------------------|-------------------------------------------------|----------------------------|--------------|
| 1                  | Welcome and Announcement                        | Leslie Amani (Moderator)   | 9:00 – 9:05  |
| 2                  | Gratitude and Overview                          | Tricia Blocher (CDPH)      | 9:05 – 9:10  |
| 3                  | SARS-COV-2 Outpatient Treatment and Prophylaxis | John Openshaw, M.D. (CDPH) | 9:10 – 9:20  |
| 4                  | Health Partner Ordering Portal                  | Caroline Barnhill (CDPH)   | 9:20 – 9:30  |
| 5                  | Transfer and Redistribution                     | Alan Hendrickson (CDPH)    | 9:30 – 9:35  |
| 6                  | Resources and Referrals                         | Kate McHugh (CDPH)         | 9:35 – 9:40  |
| Q&A and Discussion |                                                 |                            | 9:40 – 9:55  |
| 7                  | Wrap-up                                         | Leslie Amani (Moderator)   | 9:55 – 10:00 |

| <b>Sotrovimab 500 mg</b><br>given as a single infusion | Intravenous | 12 years and older and weighing at least 40 kg | As soon as possible, but within 10 days of symptom onset | Compared to placebo, <u>85% relative risk reduction</u> in hospitalizations or deaths. | Effective against Delta and Omicron             |

# Currently Available Anti-SARS-COV-2 Treatments: Antivirals

| Drug                                                                                               | Route       | Age groups authorized for treatment                                                                            | Timing of Treatment                                     | Effectiveness                                                                                        | Activity Against Variants Currently Circulating |
|----------------------------------------------------------------------------------------------------|-------------|----------------------------------------------------------------------------------------------------------------|---------------------------------------------------------|------------------------------------------------------------------------------------------------------|-------------------------------------------------|
| <b>Nirmatrelvir 300 mg with ritonavir 100 mg (Paxlovid)</b><br><br>Orally twice daily for 5 days   | Oral        | 12 years and older and weighing at least 40 kg                                                                 | As soon as possible, but within 5 days of symptom onset | Compared to placebo, <a href="#">a relative risk reduction of 89%</a> in hospitalizations or deaths. | Effective against Delta and Omicron             |
| <b>Remdesivir (Veklury)</b><br><br>200 mg IV on Day 1, followed by 100 mg IV daily on Days 2 and 3 | Intravenous | FDA approved in 12 years and older and weighing at least 40 kg; EUA for <12 years of age weighing 3.5 to 40 kg | As soon as possible, but within 7 days of symptom onset | Compared to placebo, <a href="#">a relative risk reduction of 87%</a> in hospitalizations or deaths. | Effective against Delta and Omicron             |
| <b>Molnupiravir (Legevriv) 800 mg</b><br><br>Orally twice daily for 5 days                         | Oral        | 18 years and older                                                                                             | As soon as possible, but within 5 days of symptom onset | Compared to placebo, <a href="#">a relative risk reduction of 30%</a> in hospitalizations or deaths. | Effective against Delta and Omicron             |

# Prioritization of Treatment Options for Omicron

In order of preference, the NIH recommends using one of the following treatment options (considering a patient's full clinical status, including drug-drug interactions) for mild to moderate infection:

1. **Nirmatrelvir 300 mg with ritonavir 100 mg (Paxlovid)** orally twice daily for 5 days, initiated as soon as possible and within 5 days of symptom onset in those aged  $\geq 12$  years and weighing  $\geq 40$  kg
2. **Sotrovimab 500 mg** as a single IV infusion, administered as soon as possible and within 10 days of symptom onset in those aged  $\geq 12$  years and weighing  $\geq 40$  kg who live in areas with a high prevalence of the Omicron VOC
3. **Remdesivir 200 mg** IV on Day 1, followed by **Remdesivir 100 mg** IV daily on Days 2 and 3, initiated as soon as possible and within 7 days of symptom onset in those aged  $\geq 12$  years and weighing  $\geq 40$  kg; EUA in children under the age of 12 years. Doses should be adjusted for pediatric patients.
4. **Molnupiravir 800 mg** orally twice daily for 5 days, initiated as soon as possible and within 5 days of symptom onset in those aged  $\geq 18$  years **ONLY** when none of the above options can be used.

# Post-Exposure Prophylaxis

- Currently we have no FDA authorized or approved therapeutics for post-exposure prophylaxis
- Bam/Ete and REGEN COV are the only drugs with EUAs for post-exposure prophylaxis and neither are effective against Omicron
- As of January 24, 2022:
  - The FDA has revised bam/ete and REGEN COV EUAs to limit use to patients who are likely to have been exposed or infected to a variant that is susceptible to these treatments
  - Use of bam/ete and REGEN COV are **not authorized** for use in any US state

# Anti-SARS-COV-2 Monoclonal Antibody for Pre-Exposure Prophylaxis

| Drug                                                                                                     | Route         | Age groups authorized for treatment            | Pre-Exposure Prophylaxis Effectiveness                                                  | Activity Against Variants Currently Circulating |
|----------------------------------------------------------------------------------------------------------|---------------|------------------------------------------------|-----------------------------------------------------------------------------------------|-------------------------------------------------|
| <b>Tixagevimab 150 mg / cilgavimab 150 mg (Evusheld)</b><br>Given as two separate consecutive injections | Intramuscular | 12 years and older and weighing at least 40 kg | Reduced the risk of developing symptomatic COVID-19 by <u>77% compared to placebo</u> . | Effective against Delta and Omicron             |

# Health and Human Services Therapeutics Locator

## COVID-19 Therapeutics Locator

The national map below displays public locations that have received shipments of U.S. Government-procured COVID-19 therapeutics under **U.S. Food and Drug Administration (FDA) Emergency Use Authorization (EUA)** authority. The locations displayed in the locator have reported stock on hand within the last day.

The monoclonal antibody treatment **Evusheld** (Astra Zeneca), as well as the oral antiviral therapies **Paxlovid** (Pfizer), and **molnupiravir** (Merck) are products authorized by the FDA for either prevention (Evusheld) or treatment (Paxlovid and molnupiravir) of COVID-19.

These therapies

This therapeutics locator is intended for provider use, as the included therapies require a prescription by a licensed and authorized provider. Patients should not contact locations directly.

- Three therapeutics are processed through HPoP:
  - Evusheld
  - Paxlovid
  - Molnupiravir
- Allocation numbers are released Monday to the counties/regions.
- Specific site allocations are coordinated through the locals and region and are based on those previously identified and entered into HPoP and the ordering spreadsheet.
- New sites cannot be added at this time unless coordinated through and approved by, the county/region. These site additions can only be accepted when submitted by the county/region.
- Providers cannot place orders themselves at this time. Orders are entered by the State.

# HPoP – Activating Accounts

- Once approved, a site will be entered into HPoP. Providers should expect to receive an email to activate their account.
  - Please note, this will NOT occur immediately. It will take 24 to 48 hours from the time the state receives the information, NOT when the information is given to the counties.
- If providers do not receive an email and was/is a vaccine provider, they should try using their vaccine login on this site: [CDC VPoP Provider Sign-in Page](#)
  - HPoP is different than Vaccine Partner Ordering Portal (VPoP). Logging into VPoP will not show therapeutics accounts.
- Any issues with accessing accounts can be sent to [cdphtherapeutics@cdph.ca.gov](mailto:cdphtherapeutics@cdph.ca.gov).

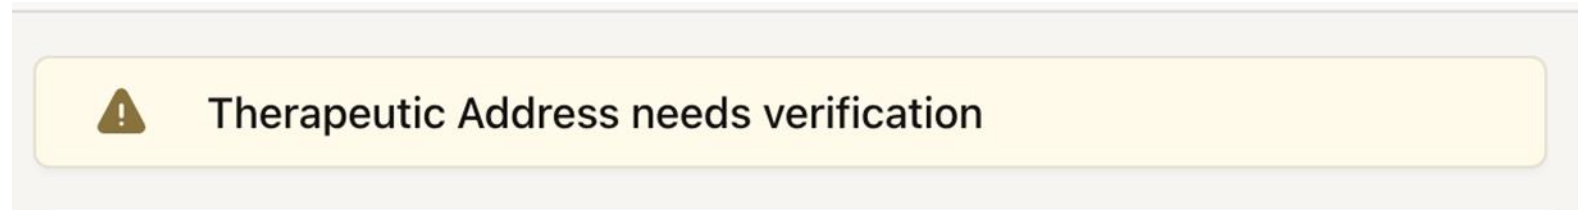

# HPoP – Verifying Accounts

- Accounts must be verified by the contacts associated with the site account. No orders can be placed without this step.
- What does verifying an account mean?
  - One contact listed on the account must log in, ensure the site address is correct/make any changes, and enter open hours.
  - Once reviewed and hours entered, the contact will need to click the “address and hours verified” check box at the bottom and then “apply changes.”
  - A banner at the top of the account will show “therapeutic address verified.”
  - If the banner says, “therapeutic address needs verification,” the site is not yet fully activated and is not eligible for orders.

# HPoP – Verifying Accounts (continued)

- Account verification not completed

- Account verification completed

# HPoP – How to Verify an Account

| Provider Details                                                                           | Receiving Address / Hours                                              | Permissions                                                                         |
|--------------------------------------------------------------------------------------------|------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| Receiving Address / Hours                                                                  |                                                                        |  |
|  Physical | <b>3104 PONTE MORINO DR STE 110</b><br>CAMERON PARK EL DORADO CA 95682 |  |

# HPoP – How to Verify an Account (continued)

Maintain Address

| Day       | All Hours | From1 | To1 | From2 | To2 |
|-----------|-----------|-------|-----|-------|-----|
| Monday    |           |       |     |       |     |
| Tuesday   |           |       |     |       |     |
| Wednesday |           |       |     |       |     |
| Thursday  |           |       |     |       |     |
| Friday    |           |       |     |       |     |
| Saturday  |           |       |     |       |     |
| Sunday    |           |       |     |       |     |

When editing To and From values 12:00 am at the top of the list represents 00:00.  
However, 12:00 am at the bottom of the list represents 24:00.

☐ Receiving Address & Hours Verified

Cancel

Apply Changes

# HPoP – Ordering and Shipping Status

- Can be viewed in the site account under “Therapeutic Orders”
- If the status shows anything other than “canceled,” it is active and in process.
  - There is nothing else the provider needs to do.
- Orders can take 4-7 business days to arrive once the order is entered into HPoP by the State.
- Shipping can be tracked in HPoP or via [Third-party Redistributor \(TPR, AmerisourceBergen\) Sign-in](#)
  - If the order does not appear in the TPR Amerisource shipping site, it has not yet shipped.

# HPoP – Reporting Inventory

- Must be entered daily.
- Not cumulative, e.g.:
  - Day one entry: 5 of 20 administered
  - Day two entry: 5 of 15 administered

# Transfer and Redistribution

Alan Hendrickson, CDPH

# Transfer and Redistribution of Therapeutics

# Transfer and Redistribution of Therapeutics

## Why “No!”:

- Consistency giving the low allocation of all therapeutics
- HPoP does not support redistribution
  - Inventory/Usage reporting remains the responsibility of the redistributor
  - Inventory may impact future allocations
- HPoP does support the transfer of therapeutics but:
  - Therapeutics are allocated by Operational Area (county) and mutual aid region
  - Redistribution & transfers may adversely impact allocation
