CHA Position: **Vote YES on SB 979**

To: The Honorable Members of the California State Senate

From: Kathryn Austin Scott, Senior Vice President, State Relations and Advocacy

Hospitals and health systems have been at the forefront of caring for patients during the COVID-19 pandemic. Among the lessons learned from the pandemic is that California's health care delivery system functions best with clear and consistent statewide flexibilities and direction. However, during a declared emergency, California's health plan and insurer regulators don't have the authority they need to act swiftly to ensure patients in California hospitals can get the care they need when they need it most. Senate Bill (SB) 979 (Dodd, D-Napa) would streamline the process for these state regulatory agencies to respond to and support the health care delivery system when the governor declares a state of emergency, or the state public health officer declares a public health emergency.

The Department of Managed Health Care (DMHC) and the Department of Insurance have automatic authority during a state of emergency to take specified actions, such as requiring health plans to approve patients to see out-of-network providers if in-network providers are unavailable, or relaxing time limits for prior authorization or filing claims. However, DMHC and the Department of Insurance have this authority only when enrollees or the insured are physically "displaced" due to the emergency.

During a pandemic like COVID-19, individuals are not physically displaced, so this DMHC and Department of Insurance authority doesn't apply. SB 979 would give DMHC and the Department of Insurance the authority to require health plans and insurers to take additional steps to assist consumers whose health is affected by a disaster, even if they are not "displaced." COVID-19 has shown the necessity of having a health care system that responds to changing health care needs in states of emergency. Without SB 979, there would be no guarantee that the state's health care providers will have the flexibility to ensure their patients can receive critical care in future disasters.

For these reasons, the California Hospital Association and its more than 400 hospital and health system members strongly urge your "AYE" vote on SB 979.
