

Minutes to Hours – The Kaiser Permanente Northern California Evacuation Toolkit

Shakiara Kitchen, CHEP, HEM
Regional Emergency Management
Kaiser Permanente Northern California

Suzy Fitzgerald, MD, FACEP, FAAEM
TPMG Emergency Management Training Director
Kaiser Permanente Northern California

1

Disclosure

The presenters for this session have no disclosures to report.

This presentation does include references to the branded product we used in our Evacuation Toolkit.

The references are included in order to fully demonstrate the steps of the evacuation process using the components of the KP NCAL Evacuation Toolkit.

2

Objectives

After attending this session, learners will be able to:

- List the general considerations for hospital evacuation planning and how these considerations apply to hospital / healthcare systems across California.
- Describe the three stages of evacuation--Pre-Evacuation, Evacuation, and Post-Evacuation--and the considerations for each stage.
- Adapt the components of a standardized evacuation toolkit for use in their hospital / healthcare system.

Agenda

Introduction & Agenda Review

A Tale of Two Evacuations

The New Normal

Considerations for Hospital Evacuation Planning

The Stages of Evacuation: Pre / Evac / Post

KP NCAL Toolkit Review

Evacuation Toolkit Template

The Evacuation Toolkit: Making It Your Own

4

A Tale of Two Evacuations

5

KP Northern California: A Tale of Two Evacuations

Tubbs Fire – October 8, 2017 -- Kaiser Permanente Santa Rosa evacuated under direct, increasing fire threat and breakdown of safe care environment.

➤ **“Evacuate Now” situation**

- 122 Patients; 3-1/2 hours: Evacuated via Ambulances, Buses, and Cars
- KP San Rafael received 87 patients
- Others to KP SFO, other KP, community hospitals, home

Kincade Fire – October 23, 2019 – Kaiser Permanente Santa Rosa evacuated under fire threat, evacuation warning, then mandatory evacuation order.

➤ **Multiple anticipatory actions taken by Hospital Command Center ahead of evacuation order**

- Hospital census decreased by patient transfers to other KP hospitals
- Pre-Evacuation preparation initiated:
 - Hospital census review for evacuation needs
 - Just-in-time evacuation training
 - Evacuation tag preparation
 - Unit / patient preparation including communication with staff, patients, & families

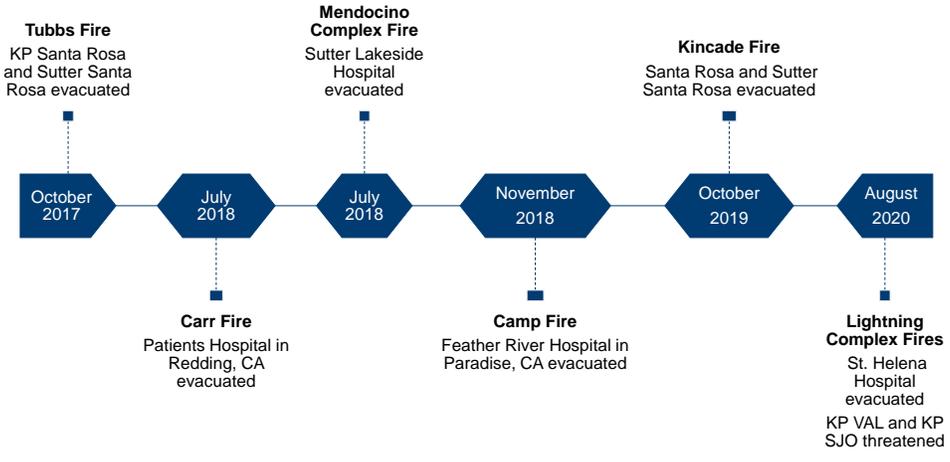

6

The New Normal

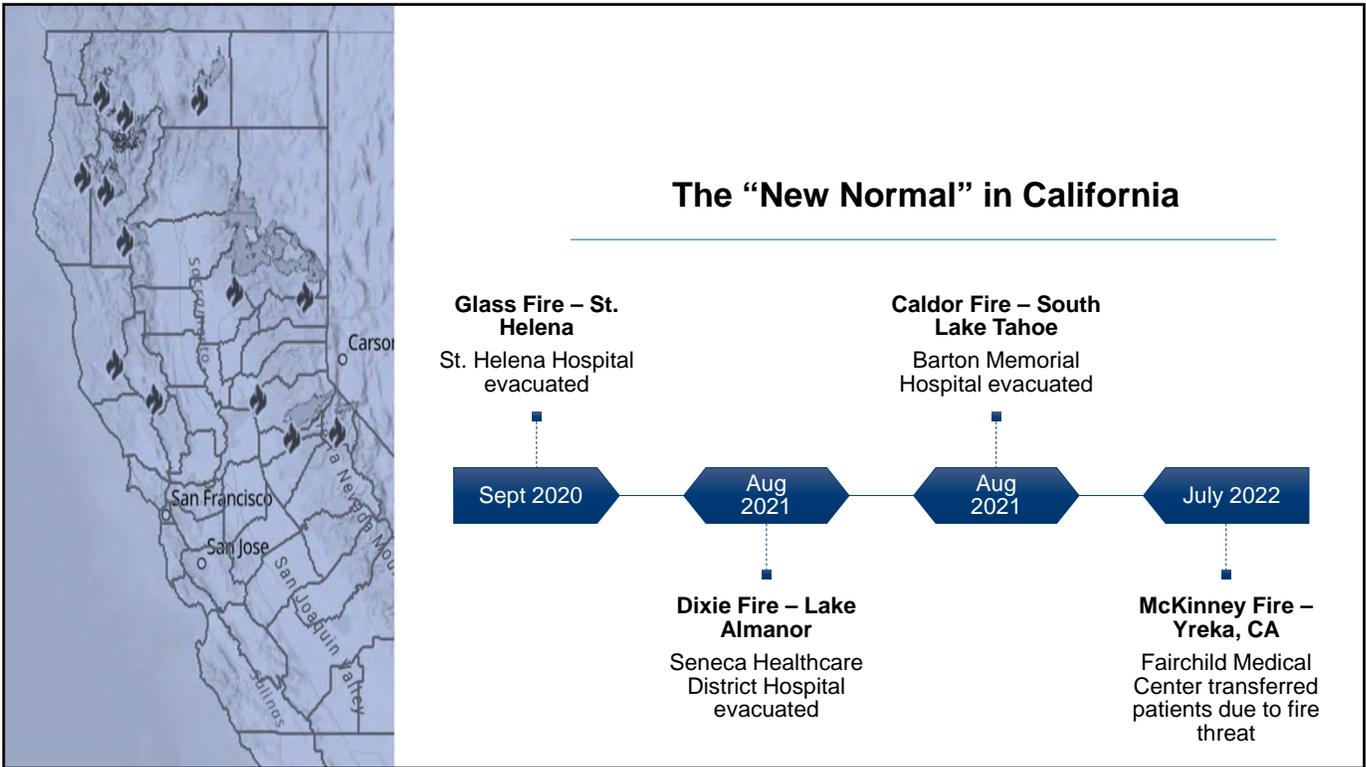

7

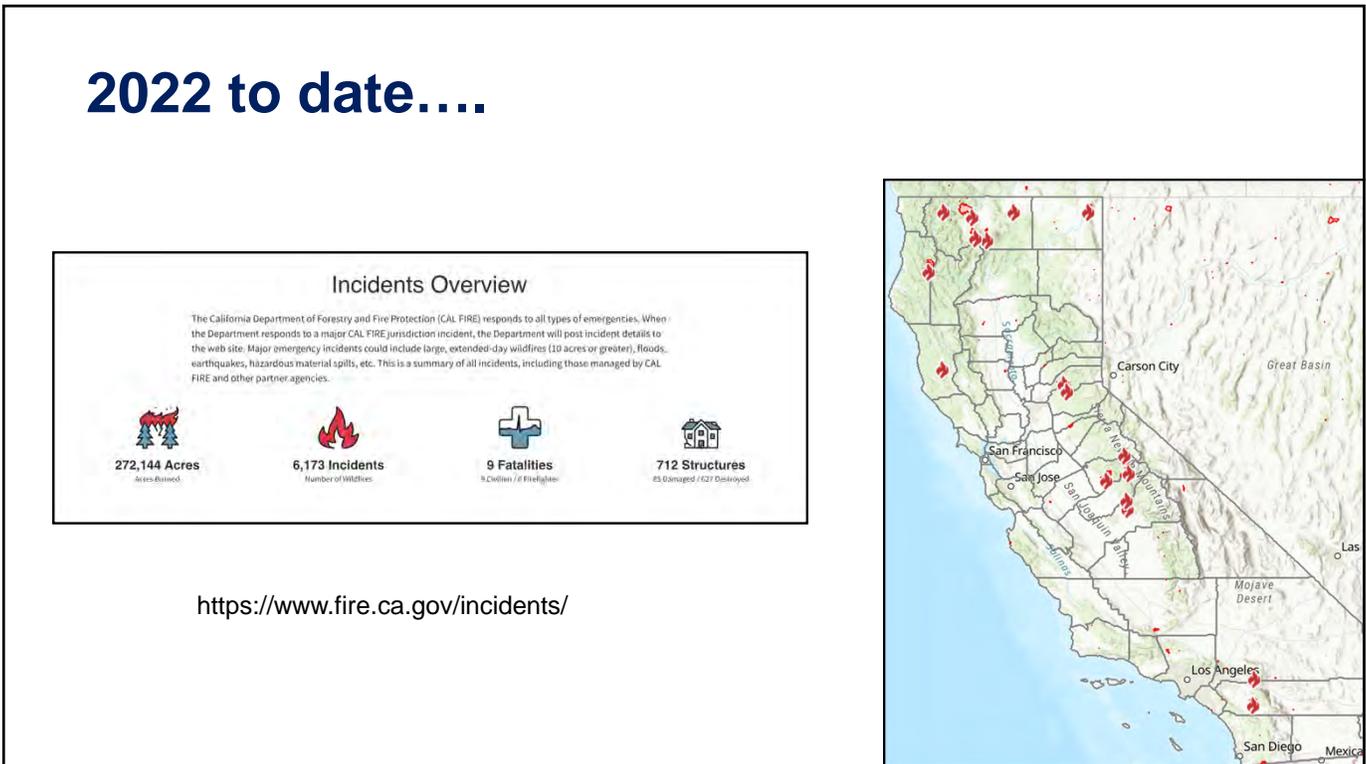

The "New Normal" in California

8

9

10

Active Fires as of 9-09-22

11

General Considerations for Hospital Evacuation Planning

12

Evacuation Coordination

The Right Place at the Right Time in the Right Way

Coordination between Hospital, Healthcare System and County is required in the Pre-Evacuation and Evacuation stages.

These are not normal operations and regular transfer procedures may not apply.

13

Considerations for Hospital Evacuation Planning

Census Management

Specialty Patient Population Considerations:
Labor & Delivery, Pediatrics, Pediatric Critical Care, Neonatal Critical Care, Adult Critical Care, Neurosurgery, others

Access to Transportation Assets

Medication Considerations

Rapid Electronic Medical Record Patient Discharge Procedures

Infection Prevention

Communication / Notification County & State Entities

EMTALA & Other Regulatory Considerations

 KAISER PERMANENTE.

14

The Stages of Evacuation: Pre-Evacuation, Evacuation, & Post-Evacuation

15

The Pre-Evacuation Stage

When evacuation is anticipated but not required or mandated.

Key Steps:

- Notify appropriate chain of command, internal and external
- Activate Hospital Command Center
- Evaluate hospital census for acuity and transfer requirements
- Transfer of patients ahead of evacuation requirement or mandate
- Review Evacuation Plan & Toolkit
- Prepare evacuation tags and checklists
- Assign Incident Commander and key Evacuation-specific roles

16

The Evacuation Stage

When evacuation has been initiated and/or is in progress.

Key Steps:

- Assign Evacuation-specific and additional command center roles to provide support including:
 - Command Staff, Transportation Unit Leader, Public Information Officer, Patient Family Assistance Branch Director, Family Reunification Unit Leader, others
- Activate Evacuation Plan and use Toolkit resources to prep, stage, and evacuate patients
- Communicate status to employees on shift / off shift
- Communicate status to patients, families, and media
- Establish Infection Prevention Plan for staging and transport (event/patient-specific)

The Post-Evacuation Stage – Immediate & Repopulation

After evacuation is complete, includes immediate and repopulation steps.

Immediate

- Secure pharmaceuticals—ensure temperature control
- Final sweep → then secure building(s)
- Track and reconcile patients sent to receiving facilities

Repopulation

- Prepare building(s) for re-entry:
 - Infection control protocols, restocking supplies, cleaning HVAC system, others
- Obtain County & State Regulatory Clearance(s)
- Repopulate medical center including return of staff and repatriation of patients

Meeting the Needs of Patients and Employees After Evacuation

Patients

- Medications / medical equipment / medical records
- Essential care including Oncology, non-elective surgeries / procedures, others

Employees

- Impact assessment: Are they safe? Are they housed? What do they need?
- Consider financial and other support measures for those impacted
- Consider reassignment / pay practices as appropriate

23

Introduction to the Evacuation 1-2-3 Tracking System

24

The 3 Fundamental Components of Patient Evacuation

- 1 Room Evacuation:** Movement of patients to a staging area.
- 2 Transportation:** Sending patients to a destination.
- 3 Destination:** Patient receiving facilities.

25

Room Evacuation Tools

Evacuation Tag

EVACUATE

Tag Receipt Holder

26

Evacuation Tag Overview - Front

Patient portion

Door portion

Patient information

DNR and ISO status

Notes section

Triage categories

Facility information

Destination receipt

Transportation receipt

Mobility status (select one)

Resource requirements

Accountability receipt

27

Evacuation - Tag Preparation

When evacuation is ordered, place patient labels on the tag's 4 receipts.

28

Evacuation - Tag Preparation

When evacuation is ordered, place patient labels on the tag's 4 receipts.

The diagram illustrates the preparation of an evacuation tag. The tag is divided into four numbered sections (1-4) that are torn out. Section 1 is the patient information receipt, section 2 is the triage receipt, section 3 is the isolation receipt, and section 4 is the door receipt. Red arrows point from these sections to a stack of four receipts being placed into a binder.

29

Evacuation – Patient Application

1. Separate the tag and indicate any relevant information on the patient portion of the tag.

The photograph shows a patient in a hospital bed with a nurse standing by his side. An evacuation tag is attached to the patient's chest. The tag is partially filled out with patient information.

30

Evacuation – Room Door Application

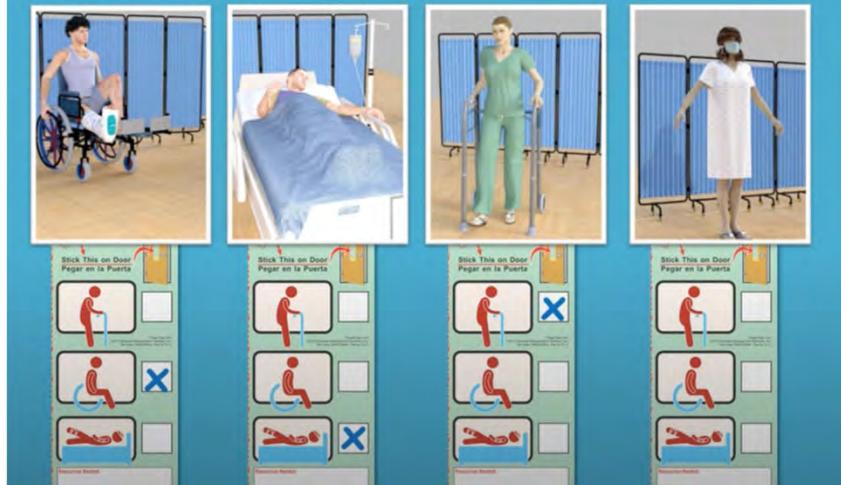

1. Expose adhesive strip and affix tag to door.

31

Evacuation – Patient Prioritization

Patient mobility status is a function of the resources needed to move the patient.

32

Evacuation – Patient Accountability

As patients are evacuated, remove and retain the yellow door receipt.

34

Evacuation - Final Walkthrough

Confirm all patients have been evacuated by ensuring no yellow receipts are visible on doors.

35

Pre-Transport Staging

Sort patients based on movement resource requirements.

-  **Highly ambulatory:**
(Low resource requirement)
-  **Moderately ambulatory:**
(Medium resource requirement)
-  **Non-ambulatory:**
(High resource requirement)

Additional Staging Considerations

Group by acuity / level of care

ICU / PICU / NICU
Med Surg Adult
Med Surg Pediatric
Labor & Delivery

Additional labeling

Transport method

- Bus /Car /Van
- Ambulance
- Critical Care Transport

Transport destination

36

Transportation – Destination Assignment

Utilize the best practical assignment of patients to transport vehicles, destination facility capability and bed availability.

Level II Trauma Center – 5 beds

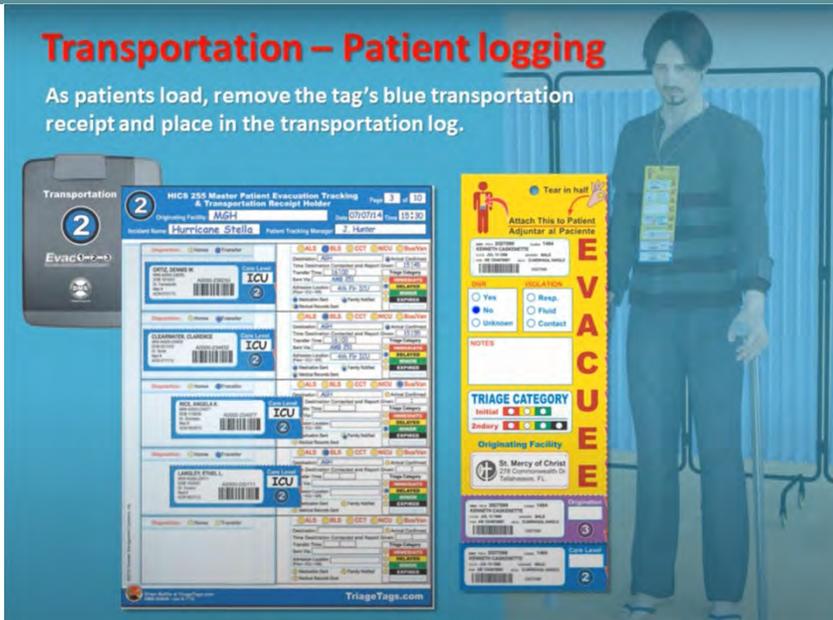

Acute Care Clinic – 4 beds

37

Transportation – Patient logging

As patients load, remove the tag's blue transportation receipt and place in the transportation log.

38

Transportation – Patient logging

As patients load, remove the tag's blue transportation receipt and place in the transportation log.

The screenshot displays the HICS 255 Master Patient Evacuation Tracking & Transportation Receipt Holder software. The interface includes a 'Transportation' receipt on the left and a 'Triage Tags' tag on the right. The receipt shows patient information such as name, room, and status. The tag includes fields for 'Triage Category' (Initial, Secondary), 'Originating Facility' (St. Mary of Christ), and 'Isolation' (Yes, No, Unknown, Resp, Fluid, Contact). The tag also has a 'Tear in half' instruction and a 'Attach This to Patient Adjuster at Patients' instruction.

39

Transportation – Patient logging

As patients load, remove the tag's blue transportation receipt and place in the transportation log.

The screenshot displays the HICS 255 Master Patient Evacuation Tracking & Transportation Receipt Holder software. The interface includes a 'Transportation' receipt on the left and a 'Triage Tags' tag on the right. The receipt shows patient information such as name, room, and status. The tag includes fields for 'Triage Category' (Initial, Secondary), 'Originating Facility' (St. Mary of Christ), and 'Isolation' (Yes, No, Unknown, Resp, Fluid, Contact). The tag also has a 'Tear in half' instruction and a 'Attach This to Patient Adjuster at Patients' instruction.

40

Destination – Patient Receiving

Upon arrival at destination, remove the purple receipt and place in the destination log.

The image displays two forms used in an evacuation process. On the left is the 'Evacuation Destination Receipt Holder', a purple document with a large number '3' in a circle. It contains a header with 'Destination Point: Hurricane Stella', 'Incident Name: Hurricane Stella', and 'Recorder Name: C. Flesher'. Below this are four rows of receipt stubs, each with a patient name and 'MGH' as the destination. The stubs are: 'DITTE, DENNIS R.', 'RICE, ANGELA K.', 'CLEARMETER, CLARENCE', and 'LAMBLEY, STELL L.'. A fifth stub is shown separately at the bottom right. On the right is a yellow 'Patient Receiving' tag, also with a large number '3' in a circle. It includes a 'Tear in half' instruction, a patient name 'KENNETH CARABINETTA', and checkboxes for 'DNR' (Yes/No/Unknown) and 'ISOLATION' (Resp./Fluid/Contact). It also has a 'NOTES' section, 'TRIAGE CATEGORY' (Initial and Endary), and 'Originating Facility' information for 'St. Mercy of Christ'.

43

Destination – Patient Receiving

Upon arrival at destination, remove the purple receipt and place in the destination log.

This image is identical to the one above, showing the 'Evacuation Destination Receipt Holder' and the 'Patient Receiving' tag. The receipt holder contains stubs for 'DITTE, DENNIS R.', 'RICE, ANGELA K.', 'CLEARMETER, CLARENCE', and 'LAMBLEY, STELL L.', all with 'MGH' as the destination. The receiving tag includes patient information for 'KENNETH CARABINETTA' and checkboxes for 'DNR' and 'ISOLATION' options.

44

Destination – Patient Receiving

Upon arrival at destination, remove the purple receipt and place in the destination log.

The image shows a purple 'Evacuation Destination Receipt Holder' form and a yellow 'EVACUATE' tag. The form includes fields for 'Destination Point' (3), 'Incident Name' (Hurricane Stella), 'Patient Name' (C. Fisher), and 'Date' (07/07/14). It contains several 'MGH' (Massachusetts General Hospital) labels with barcodes and checkboxes for 'DISEASE' (Yes/No/Unknown) and 'ISOLATION' (Resp./Fluid/Contact). A 'TRIAGE CATEGORY' section shows 'Initial' (red, yellow, green, blue) and 'Secondary' (red, yellow, green, blue) options. The 'Originating Facility' is listed as 'St. Mary of Christ 278 Commonwealth Dr Tallahassee, FL'. The yellow tag has a 'Tear in half' instruction, a patient icon, and the word 'EVACUATE' written vertically. It also includes a 'TRIAGE CATEGORY' section and the 'Originating Facility' information.

Send a receipt holder with the driver if a facility is not so equipped.

45

Destination – Origination Reporting

1. Indicate a patient's arrival in the transportation log.

The image is a screenshot of a software interface for 'MICS 300 Master Patient Evacuation Tracking & Transportation Receipt Holder'. The interface shows a 'Patient Name' field with 'Hurricane Stella' and a 'Patient Type' dropdown set to 'Patient'. The 'Destination' is 'Green Clinic' and 'Arrival Confirmed' is checked. The 'Time Destination Contacted and Report Given' is ':'. The 'Transfer Time' is '12:35' and 'Sent Via' is 'AL 805 - Van'. The 'Admission Location' is '(Floor • ICU • ER)'. There are checkboxes for 'Medication Sent', 'Family Notified', and 'Medical Records Sent'. A 'Triage Category' dropdown is set to 'IMMEDIATE'. The background shows a list of other patients with columns for 'Triage Category' (IMMEDIATE, DELAYED, MINOR, EXPIRED) and 'Status' (ARRIVED, DELAYED, MINOR, EXPIRED).

46

Destination – Origination Reporting

1. Indicate a patient's arrival in the transportation log.

ALS **BLS** **CCT** **NICU** **Bus/Van**

Destination: Arrival Confirmed

Time Destination Contacted and Report Given:

Transfer Time:

Sent Via:

Admission Location: (Floor • ICU • ER)

Evacuation Checklists

56

KAISER PERMANENTE Kaiser Permanente Northern California

PRE-EVACUATION PREPARATION CHECKLIST
RAP = Review, Assign, Prepare

This checklist should be used to guide actions when medical center evacuation is being considered. Taking these steps in the pre-evacuation phase will greatly facilitate evacuation if/when evacuation is required.

REVIEW:

- KP NCAL Evacuation Toolkit including all Checklists, Evac 1-2-3 System, and Evac 1-2-3 Instruction Video
- Your medical center Evacuation Plan
- Current situation with:
 - o County Medical Health Operational Area Coordinator (MHOAC)
 - o KP NCAL Regional Command Center (utilize HCM Hotline to notify if RCC not open—1-800-311-2113)

ASSIGN:

- Evacuation Unit Managers
 - o For all patient care units including ED, Pre-Op, PACU
- Evacuation Tracking Manager
- Evacuation Staging Manager
- Evacuation Transport Manager
- Incident Commander (if not already assigned)

PREPARE:

- Review Checklist 1 – Evacuation Steps.
- Incident Commander should review Evacuation Incident Commander Checklist (Checklist 2) and complete Evacuation Planning Worksheet (Checklist 2a.)
- Create and deliver messaging for medical center:
 - o Leadership Rounding in all units/areas
 - o Overhead communication pages:
 - Pre-Evacuation Stage
 - Evacuation Stage
 - o Staff-facing message for medical center disaster hotline.
- Review other checklists and actions with Evacuation Unit, Tracking, Staging, Transport Managers, and others.
- Print current ED and hospital census. Determine total number and location of patients on site.
- Estimate number of transporters required:
 - o Suggest planning for 1 transporter for every 4 patients. This ratio may change if there are a large number of non-ambulatory patients.

KAISER PERMANENTE Kaiser Permanente Northern California

- Determine total number and approximate location of all employees on site
 - o Collect daily staffing reports: TPMS & KFH
- Evaluate all ED and inpatients for mode of transport and transport resources required, collect this information on the ED/hospital census document.
- Print Evacuation Reports for all ED patients and inpatients.
- Print Labels (10 per patient) for all ED patients and inpatients
- Compile Evacuation Packets for all ED patients and inpatients:
 - o Evacuation Report
 - o Labels (10)
 - o Evacuation Tag—*note—if not filling out tags at this point, indicate mode of transport and transport resource required at the top of the evacuation report for easy transfer onto tags if/when evacuation required.*
- Complete Evacuation Kits for each unit:
 - o ED Patient / Inpatient Census List
 - o Patient Evacuation Packets (above)
 - o Yellow Receipt Holders
 - o Extra evacuation tags
 - o Evacuation Report Job Aid
 - o Leave of Absence Job Aid
 - o Sharpies, paper clips, regular pens, clipboard(s)
- Compile Tracking Manager Kit:
 - o ED/Inpatient Census List
 - o Tracking Manager Checklist
 - o Blue Receipt Holders
 - o Sharpies, paper clips, regular pens, clipboard(s)

57 | Copyright © The Permanente Medical Group and Kaiser Permanente. All rights reserved.

57

KAISER PERMANENTE Kaiser Permanente Northern California

CHECKLIST 1: EVACUATION STEPS

1. INCIDENT COMMAND:
Assign Incident Commander Role.

2. COMPLETE EVACUATION WORKSHEET:
Incident Commander completes Evacuation Worksheet (Checklist 2a) & orders evacuation.

3. ASSIGN HICS ROLES:
Incident Commander to assign the following positions:

- o Liaison Officer
- o Safety Officer
- o Security Officer
- o Evacuation Unit Managers (All ED and hospital units)
- o Evacuation Tracking Manager
- o Evacuation Staging Manager
- o Evacuation Transport Manager
- o Planning Section Chief *
- o Operations Section Chief *
- o Logistics Section Chief *

**IF TIME AND PERSONNEL AVAILABILITY ALLOWS*

3. ED & UNIT EVACUATION PREPARATION:
Unit Managers & staff coordinate & facilitate ED & Unit evacuation prep using:

- o Unit Manager Checklist
- o RN Bedside Patient Prep Checklist

4. BEGIN PATIENT & STAFF TRACKING:
Department Managers & Chiefs complete department status report and provide to HCC. This should include daily staffing reports and schedules for all open departments and units to determine number of staff and clinicians on-site.

5. MOVE PATIENTS FROM ROOMS:
Transport Manager & Team evacuates patients from rooms and gives yellow receipt to Tracking Team member on unit.

KAISER PERMANENTE Kaiser Permanente Northern California

6. CONTINUE PATIENT TRACKING:
Tracking Team places yellow receipt in Yellow Receipt Holder.

7. TRANSPORT PATIENTS TO STAGING AREAS:
Transport Team transports patients to Staging & Transport Area.

8. COORDINATE TRANSPORTS OUT OF FACILITY:
Staging Manager coordinates with Tracking Manager and Liaison Officer to facilitate transport out of facility.

9. MONITOR PATIENTS IN STAGING AREA:
Staging Team monitors patients while in Staging & Transport Area.

10. LOAD PATIENTS ONTO TRANSPORT VEHICLE:
Transport Team loads patients onto transport vehicle, completes "Time-Out" process per checklist, then gives Blue Receipt to Tracking Team at egress point.

11. TRACK PATIENT EXIT FROM FACILITY:
Tracking Team at egress point places Blue Receipt in Blue Receipt Holder.

12. COMPLETE PATIENT TRACKING:
Tracking Team and Hospital Command Center should compare Patient Census List against all Yellow and Blue Receipts collected locally, and all Purple Receipts collected at evacuation destination facilities. Regional Command Center to assist when needed.

CHECKLIST 2A: EVACUATION PLANNING WORKSHEET
For Incident Commander & Hospital Command Center

What level of evacuation is necessary?

- Horizontal
- Vertical
- One Unit
- Multiple Units
- Single Building
- Multiple Buildings
 - Hospital
 - NICU(s)
 - Administration Buildings
 - Other Buildings
 - Entire Campus
 - Other _____

How many patients need to be evacuated?

Number of patients _____

How many staff and clinicians need to be evacuated?

Number of staff and clinicians _____

Which evacuation order should be used? How long do staff have to prepare to move patients?

- Immediate: No time to prepare, evacuate now
- Rapid: Limited time to prepare (1-2 hrs. prep, all out in 4-6 hrs.)
- Gradual: Extended time to prepare (wait for further direction)
- Prepare only: Prepare but do not move patients

Will elevators be used?

- Yes
- No
- Maybe – Needs evaluation to determine

Checklist 2B: EVACUATION PLANNING WORKSHEET

If unable to use elevators, choose separate stairwells to be used for wheelchair/bed-bound patients and ambulatory patients:

- Select one stairwell for wheelchair/bed-bound patients per tower/unit/floor (per facility layout)
- Select one stairwell for ambulatory patients per tower/unit/floor (per facility layout)
- Confer with Safety Officer & Incident Commander to select

Where will the Discharge Area(s) be located for discharged patients waiting for ride?

Where will the Staging & Transport Area(s) be located for patients awaiting transfer / transport?

Where will ambulances, cars, and buses pick up patients?

Should staff be called in from home to help with evacuation?

- Yes
- No

CHECKLIST 2: EVACUATION INCIDENT COMMANDER

- Assign Incident Commander Role
- Activate Hospital Command Center
- Complete Evacuation Worksheet
- Review Pre-Evacuation Checklist
- Notify County of evacuation status
- Call HCM Hotline – 1-800-311-2113 – to notify Regional Command Center
- Order evacuation
- Communicate evacuation order to Medical Center—see Pre-Evacuation Checklist for details

IF IMMEDIATE OR RAPID EVACUATION NEEDED, OR LIMITED STAFF AVAILABLE, Incident Commander to assign the following roles immediately, give role checklist and radio or other communication device to each:

- Liaison Officer
- Safety Officer
- Security Officer
- Evacuation Unit Managers (All ED and hospital units)
- Evacuation Tracking Manager
- Evacuation Staging Manager
- Evacuation Transport Manager
- Planning Section Chief *
- Operations Section Chief *
- Logistics Section Chief *

**IF TIME AND PERSONNEL AVAILABILITY ALLOWS*

Ongoing event management per other Evacuation Checklists, Hospital Incident Command System, the Hospital Command Center, and Emergency Operations Plan.

KAISER PERMANENTE Kaiser Permanente Northern California

CHECKLIST 5: RN BEDSIDE EVACUATION PREPARATION

- Fill out evacuation tag.
- Determine recommended mode of transport on front of evacuation tag.
- Determine what resources required for transport, list on evacuation tag, and place resources in labeled bag with patient.
- Determine what personal items are essential for patient to take, and place in labeled bag with patient.
- Split tag and stick right side of patient tag (green side of tag) to door.
- Place left side of patient tag on patient (yellow side of tag).

CHECKLIST 5: RN BEDSIDE EVACUATION PREPARATION KAISER PERMANENTE NORTHERN CALIFORNIA
REGIONAL EMERGENCY MANAGEMENT TEAM

KAISER PERMANENTE Kaiser Permanente Northern California

CHECKLIST 6: EVACUATION STAGING MANAGER
Suggest RN or Physician with clinical and management expertise including Nurse Manager, AHM, Charge RN, Emergency Physicians

- Assign Staging Team members to all Staging Areas.
- Designate staging area collection points based on transport mode:
 - Bus / Van / Car
 - BLS
 - ALS
 - Critical Care
 - PICU
 - NICU
 - Discharge Area
- Instruct Staging Team members to confirm patients in appropriate staging area once arrived.
- Instruct Transport Team members to assign a staff member to every patient.
 - Utilize staff from labor pool if open or reassign staff as their units/areas are evacuated
 - Staff member may be clinical or non-clinical
 - Staff member to direct observe, assist, and move patient
- Work with Tracking Manager and Liaison Officer to coordinate ambulance transfers.
- Work with HCC and Incident Commander to ensure appropriate resources for care during transport is provided.
 - Coordinate resources for ambulance transports.
 - Coordinate resources and staff required for Bus, Van, or Car transports.

CHECKLIST 6: EVACUATION STAGING MANAGER KAISER PERMANENTE NORTHERN CALIFORNIA
REGIONAL EMERGENCY MANAGEMENT TEAM

KAISER PERMANENTE Kaiser Permanente Northern California

CHECKLIST 7: EVACUATION TRANSPORT MANAGER
Suggest Medical Center / Hospital Administrator or Manager/Leader

- Assign Transport Team members to the below areas to assist with patient transport from room to Unit Collection Point(s)/egress point(s) to Staging Area(s), and from Staging Area(s) to transport vehicles.
 - All Patient Care Units
 - All Staging Areas
- Instruct Transport Team members to transport or lead patients from room to Unit Collection Point(s)/egress point(s) via appropriate transport means based on ambulatory status, and do the following:
 - When patient leaves room or is transported from room, tear off Yellow Receipt from green door tag.
 - Give Yellow Receipt to Tracking Team member at Unit Collection Point(s)/egress point(s).
- Instruct Transport Team members to transport or lead patients to correct Staging Area section via appropriate transport means based on ambulatory status and do the following:
 - Staging Areas are arranged by level of care—see Evacuation Tag for care level required during transport.
 - Hand-off patient to Staging Team member in Staging Area.
- Instruct Transport Team members to do Time-Outs prior to final departure –
 - Time-Out Process: Tracking Team member should confirm or document the below on Blue Receipt holder:
 - Identity—Name, MRN
 - Destination
 - Time of Departure
 - Mode of Transport
 - Paperwork is complete & with patient: Evacuation Tag / Evacuation Report (2)
 - Patient care supplies, equipment, and meds required are present
- Instruct Transport Team members to transport patients from Staging Area to mode of transportation and do the following:
 - Tear off Blue Receipt from Evacuation Tag as patient leaves facility.
 - Give Blue Receipt to Tracking Team member at facility egress point.

CHECKLIST 7: EVACUATION TRANSPORT MANAGER KAISER PERMANENTE NORTHERN CALIFORNIA REGIONAL EMERGENCY MANAGEMENT TEAM

KAISER PERMANENTE Kaiser Permanente Northern California

CHECKLIST 8: EVACUATION LIAISON OFFICER
Suggest S&E, Area County Leader, Liaison

- Function as the information conduit between the Hospital Command Center and outside agencies.
- Establish contact with local, county, and state emergency agencies as appropriate:
 - County (FIRE/UC/LAS)
 - Law Enforcement
 - Fire Department
 - CHP
 - Others
- Confirm communications protocols and methods with each outside agency:
 - Means of contact
 - Methods of contact
 - Cadence of communications
- Consider the need to display a Liaison Representative to the County Emergency Operations Center (EOC) or other local entity managing event.
- Coordinate the release of patient information to external agencies with the Public Information Officer.

CHECKLIST 8: EVACUATION LIAISON OFFICER KAISER PERMANENTE NORTHERN CALIFORNIA REGIONAL EMERGENCY MANAGEMENT TEAM

KAISER PERMANENTE Kaiser Permanente Northern California

CHECKLIST 9: EVACUATION SECURITY OFFICER
Suggest Security Lead

- Coordinate all activities related to patient, staff, and facility security.
- Coordinate with the Safety Officer & NCC to implement safety plans.
- Coordinate with law enforcement, fire department, other agencies on scene.
- Print and provide facility map to NCC, law enforcement, fire department, other agencies on scene.
- Identify and secure:
 - All pedestrian ingress & egress points
 - All traffic ingress & egress points
 - Emergency Department access
- Provide crowd control.
- Provide traffic control including road closures as needed.
- Provide access to closed areas when needed.
- Ensure utilization of appropriate personal protective equipment (PPE) for all security personnel, as established by Safety Officer.
- Assign security personnel to all areas where security required.
- Post signage: including Non-Entry, Area Closed, Facility Closed, routing signage, others as needed.

CHECKLIST 9: EVACUATION SECURITY OFFICER KAISER PERMANENTE NORTHERN CALIFORNIA REGIONAL EMERGENCY MANAGEMENT TEAM

KAISER PERMANENTE Kaiser Permanente Northern California

CHECKLIST 10: EVACUATION SAFETY OFFICER
Suggest Safety Operations Lead or Safety Specialist

- Ensure health and safety of patients, personnel, and visitors; identify, monitor and mitigate hazardous conditions.
- Evaluate the facility-related incident hazards and identify vulnerabilities and unsafe areas / structures.
- Assess event situation to determine ongoing safety risks of the incident and response activities to patients, staff, and providers.
- Report assessment information to Incident Commander and NCC, and make corrective recommendations for any unsafe conditions.
- Coordinate with Safety Officer & NCC to implement safety plans.
- Work with the Incident Commander and Security Officer to complete Evacuation Planning Worksheet to determine:
 - Elevator use – Yes, No, Maybe
 - Finalized routes from units to Staging Areas
 - Internal & external ingress and egress points (rooms, building(s))
- Ensure that response personnel identify and report all hazards.
- Specify type and level of personal protective equipment (PPE) to be utilized by all individuals onsite to ensure their protection during the event.

CHECKLIST 10: EVACUATION SAFETY OFFICER KAISER PERMANENTE NORTHERN CALIFORNIA REGIONAL EMERGENCY MANAGEMENT TEAM

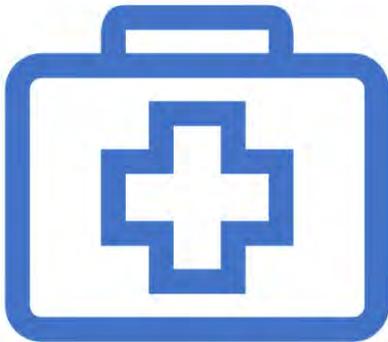

Electronic Medical Record (KP HealthConnect) Evacuation Functionality

The Evacuation Toolkit: Making It Your Own *Create, Implement, Train*

71

Making It Your Own: Creating & Implementing

Create Evacuation Toolkit

- **Create** (adapt) evacuation toolkit
- **Test** toolkit
- **Get** stakeholder buy-in
- **Re-test** a sample of the customized evacuation kit to ensure alignment before purchase if using vendor

Implement Evacuation Toolkit

- **Identify ownership** for rollout in medical center(s)
- **Coordinate** meetings & tabletop exercise(s) to socialize & educate
- **Update** Code language and/or policies as needed
- **Ensure** storage location (electronic and physical) has been identified

72 | Copyright © The Permanente Medical Group and Kaiser Permanente. All rights reserved.

72

Making It Your Own: Training

Develop Training Plan: Who, What, Where, When, How, & Why

- Define target audience(s) and training objectives
- Determine what content will meet audience-specific objectives
- Establish training mode(s) and timing
 - Education session / tabletop / functional exercise
 - Virtual / in-person
 - Real-time /on-demand / Just-In-Time

Create / Compile Training Materials

- Medical center/healthcare system-specific plans & checklists
- Leverage vendor education tools as appropriate
